Experience

03.2012 - present

Senior .NET Software Developer

InnerApps, LLC

Develop and maintain an enterprising provisioning software that utilizes COSINE LDAP/X.500 Standards found in most current operation systems.

Help architect and design new concepts entire industries ignore as 'impossible'.

03.2013 - present

CEO & Co-Founder

CaelusMinds

A small holdings company that works as a kick-board and micro-business incubator for projects.

Currently has two large-scale enterprise-level projects under its umbrella.

10.2016 - 05.2017

.NET & Web Developer

Contractor

Contacted for roughly 20+ hour work-weeks doing anything from creating a custom Content Management System to a Custom Reporting Suite designed to be cross-platform.

07.2015 - 08.2016

[Part-time] .NET & Mobile Developer

19 Ideas

Worked by myself or with a small team part-time on a slew of different projects ranging from tokenizing authentication routines in a intranet suite to rounding out an AngularJS + Cordova based mobile application.

08.2010 - 10.2014

CEO, Lead Developer & Co-Founder

Provisionists, LLP

A wide-scoped technology start-up experimenting with different niches and technologies in the web industry to make our mark.

Eventually became a solid small-scale web-host, and I left to focus on other projects since my business partner was quite capable of running the business himself.

08.2011 - 02.2012

.NET & PHP Web Developer

Contractor

Worked as a contractor for a unsigned musician based web-ring.

There was bits in pieces written in PHP and other written in ASP.NET and my job was to make them talk to each other.

They've since shut-down their services.

11.2010 - 03.2012

.NET Software Developer II

Mueller Services, Inc.

Developed a handful of 'special projects' on a smaller team composed of myself and my supervisor.

Worked on product development tickets in between the random special project, spanning from VB6 tweaks in Access '97 to configuring custom reporting subroutines in bleeding-edge web technologies.

01.2010 - 08.2010

Junior .NET Developer

Logistic Dynamics, Inc.

Helped maintain and [eventually] further develop the existing application(s) directly tied to day-to-day operations and procedures.

01.2008 -
02.2009

Application Support Specialist

Norman G. Jensen, Inc.

Now Livingston, formerly NGJ Customs Brokers.

As a Application Support Specialist; I devised and finalized a series of small to large grade Visual Basic for Application scripts to help expedite day-to-day procedures.

The finalization of one such script titled "NGJ Entry Assistant" boosted accuracy of data entry on an average of 20% and output to roughly 50% for participating offices.

06.2007 -
01.2009

Senior Import Administrator

Norman G. Jensen, Inc.

Now Livingston, formerly NGJ Customs Brokers.

Automated and devised systems to help expedite extremely large volume clients international imports to the US.

11.2005 -
06.2007

Data Entry Analyst

Norman G. Jensen, Inc.

Now Livingston, formerly NGJ Customs Brokers.

Basic, entry level data-entry position where I was given the opportunity to create my first application that increased my own productivity and accuracy by 200%.

Before long management wanted my routines in every data-entry analysts' hands.

08.2004 -
08.2010

PHP Developer & System Admin

Titan Network

Volunteer as a web and .NET application developer and system administrator for non-profit fan-site web ring.

Set the pace and passion for development early on with .NET and other web technologies. While working with other developers from different walks, building eclectic skills and techniques.
